eJIFCC - The Journal of the International Federation of Clinical Chemistry and Laboratory Medicine

Editorial

Dear Reader,

As you may know from the latest issue, the second term of Professor Grażyna Sypniewska has expired as the editor-in-chief of the Electronic Journal of IFCC. I would like to thank Grażyna for her high-quality editorial activity and also that she accepted to stay on the Editorial Board. With the 1st of January 2012 I took it over from Grażyna. Our main goal is to improve the journal and make it an established scientific forum with proper indexing and impact factor. However, it might take a longer period, and a lot of our common effort to achieve these goals.

The first issue of 2012 we will publish in a style, frame, and format as earlier. From the second issue on, we would like to give scientific and professional focus for each individual issue (e.g., dealing with recent developments of molecular diagnostics, diabetes, etc.). For a great part of these thematic issues I would like to invite guest editors who are renowned representatives of the field.

We would also like to improve the quality of the papers. The peer-review process is the key for it. However, the future issues are not meant for research papers only. We would like to open a column on educational matters, including e-learning possibilities in clinical chemistry and laboratory medicine.

Reminder: Deadline for the submission of papers for March issue is 1 February 2012.

UNDERSTANDING
LABORATORY MEDICINE

Laboratory Medicine, Critical to Healthcare Delivery and Patient Care

Laboratory medicine is an integral component of healthcare delivery systems worldwide. Up to 80% of routine patient care is dependent on a wide range of test results from the laboratory. Highly trained laboratory staff test patient samples to ensure the results are accurate, yet timely for medical decisions. Clinical staff use the test results to assist in medical diagnosis, prognosis and treatment monitoring.

IFCC Taskforce - (TF-ICO)

Terms of Reference

1. Evaluate the available evidence supporting the impact of laboratory medicine in healthcare (a critical review of published literature) with a focus on data published since 2007.

2. Develop the study design for new retrospective and prospective studies to generate evidence-based data to support IFCC promotional activities to the healthcare community and the public.

The taskforce will also work on refining the old and non-specific '70% claim' by defining some of the key decisions in the clinical process and looking at the role of lab medicine in each of these, either in specific care pathways (e.g. using published guidelines for specific conditions) or in specific settings, e.g. ER - decision to admit, acute medical ward - decision to treat etc.
Transitioning from an Abbott initiative to one driven and managed by a consortium of global professional bodies.

IUPAC - Public review of the VIN

IUPAC has received public comment on the VIN. Scientists of disciplines in clinical laboratory sciences have long recognized the need for a common language for efficient and effective communication of investigations, reporting of results, and communication of experience and scientific achievements. The “international vocabulary of metrology — Basic and general concepts and associated terms” (VIN) is designed for metrology, the science of measurement.

El Microscopio: radio x internet

Un espacio para informar, debatir problemas y encontrar soluciones

Hemos lanzado la radio iberoamericana de bioquímica clínica “El Microscopio” auspiciada por la IFCC, organizada por el Grupo de Trabajo Iberoamericano WG IANT Ibero-American Nomenclature and Translations y el comité de Medicina de laboratorio Basada en la Evidencia (C-EBLM).

El Microscopio es un programa de radio de una hora de duración, que se emite semanalmente a través de Internet. Se transmite los miércoles a partir de las 13:00 hs., hora de Argentina (GMT -3), aunque todos los programas podrán ser escuchados en cualquier momento a través del portal www.infobioquimica.com

La idea surgió a partir de la necesidad de mejorar la comunicación entre todos los laboratorios clínicos de Iberoamérica y con la IFCC, difundiendo temas de interés científico, estratégico y de actualidad.

Se tratan temas tales como el uso y la interpretación de las pruebas de laboratorio, desempeño de tecnologías y métodos, gestión del laboratorio, así como problemáticas sociales, legales, políticas y gremiales. Además, se generará un espacio para la promoción del compromiso social y ambiental de los laboratorios con sus comunidades, aspirando a mejorar la comunicación entre el equipo de salud y los pacientes.

A través de El Microscopio se podrán promover actividades y estrategias que adicionen valor al laboratorio clínico en el proceso de atención de la salud, difundir cursos y congresos, promover actividades culturales y sociales dentro del ámbito de los laboratorios clínicos como el turismo o el arte.

También, se invitará a participar en los distintos foros temáticos a través de www.infobioquimica.com de modo de facilitar la comunicación entre los académicos, residentes y estudiantes de Iberoamérica relacionados con la bioquímica clínica.

Primer Programa 13:00 hs
(GMT -3)
Internet & Distance Learning

- **Website Strategy**
  - To communicate with IFCC members by providing a facility to disseminate and exchange ideas and information
  - To provide a platform for e-teaching and e-learning by stressing IT literacy for all
  - To disseminate useful and accurate knowledge and information

- **General Actions**
  - Improve usability of website
  - Diversify content of website
  - Informing lab personnel IT knowledge and internet skills
  - Introduce IFCC members to variety of learning technologies
