The National Federation of Clinical Chemists CONAQUIC, AC, is a group of professionals as a matter of civil association whose primary mission is “To promote and pursue excellence in clinical laboratory work, for the care, education and research through the professional, economic, social, familiar and personal of Clinical Chemists country improvement”. This group was founded in 1976 under the name National Association of Clinical Chemists, AC, obtained its registration with the General Directorate of Professions Public Education Secretariat at No. F-302, in September 2008, becoming the first and only National Federation officially registered with a real union representation throughout our Home Country. Over 36 years of representation, CONAQUIC has played an important role in different aspects of health problems that have affected our population, as is the case in the year 1996 the closing of the private blood banks to the Problem Syndrome (HIV-AIDS), a fact that led to the start of coordinated with the Ministry of Health (SSA) for gestoría Act initiatives related to the professional activities of clinical laboratory activities, and participating with Health (SSA) in the amendment of the Rules of the General Health Law, in granting the Clinical Laboratory Services which set the tone for the start of the Drafting Committee of the NOM166-SSA, Mexican Official Standard establishes the requirements for the organization and operation of a clinical laboratory and modification of NOM-087-ECOL-SSA1-2002 and NOM-178-SSA 1-1998. The CONAQUIC participated in the search for better working conditions for clinical laboratory professionals, proposing and managing initiatives for the payment of “Occupational Hazards” in Institutions of Public Health, as well as bills to punish unethical practices in the exercise of the profession, as in the case of “Dichotomy”, which is the economic participation offered by clinical laboratories and other ancillary diagnostic and treatment services to physicians and/or staff as a reward or gratification, by channeling patients to conducting clinical analysis or other medical and paramedical services. This group has organized two national forums on issues of Laboratory conducted the LX Legislature of the Chamber of Deputies with the participation of universities, industry and healthcare providers Reagents and professional clinical laboratory area. One of the most important aspects in which he has particular interest our Federation is the continuing education of its members, so that to date has hosted 17 National Meeting for Analysis of Quality Assurance in the Clinical Laboratory and 37 Congresses nationals who have contributed to the updating of Clinical Chemists Country and included in these great events academic courses, workshops, symposia, roundtables and conferences with speakers of National and International quality that address issues of great importance to improve quality of life of our people through continuous quality improvement in the important contribution made by laboratory studies in the diagnosis, management and prevention of diseases. The CONAQUIC has been represented by 18 National Presidents and is currently directed by Quim. Diego de Jesús Zamora González, College of Chemical Sinaloa, who quite rightly leads the major activities of this professional group committed one of the most important activities in the current management of Q. Zamora González is undoubtedly the Professional Certification Process according to the official guidelines of the SEP through the presentation of UNICO CERTIFICATION REVIEW OF CLINICAL CHEMICAL (EUC-QUICLI) implemented by the National Assessment Center (CENEVAL) option officially approved by the Directorate General of Professions to rate Quality and Suitability in Professional Certification processes all professions in our country, which speaks to the seriousness of this process and the moral and ethical commitment that characterizes this FEDERACIONAL NATIONAL CLINICAL CHEMICAL CONAQUIC, AC.
