

Launching the IFCC eNews Flash

Dear IFCC member,

The CPD Executive Committee has decided to launch an additional form of news delivery, the **eNews Flash**.

The purpose of this is to inform the IFCC community of newsworthy and important items that do not require a full article and could be conveyed in a short message easily accessible to the busy reader.

This message is an inaugural version to highlight a new advance in the publication of the eJournal.

I urge you to keep a lookout for more messages carrying the IFCC eNews Flash.

Regards

Tahir Pillay,
eNews Editor

The Journal of the International Federation of Clinical Chemistry
and Laboratory Medicine

Electronic Journal of IFCC (eJIFCC) accepted for indexing by MEDLINE/PUBMED

All issues of the journal will be indexed and searchable, downloadable, citable from PubMed in the near future

IFCC announces that the **Electronic Journal of IFCC (eJIFCC) has been accepted by the National Library of Medicine for indexing in MEDLINE/PUBMED**. All issues of the journal will be indexed and searchable, downloadable, citable from PubMed in the near future.

Dr Khosrow Adeli, IFCC Communications and Publications Division Chair, says: "This is an important step forward for IFCC as PubMed indexing significantly improves access to eJIFCC articles and will promote IFCC internationally. **I would like to thank the eJIFCC Editor-in-Chief, Professor Gabor Kovács as well as the Editorial Board and other members of Communications and Publications Division for their contributions to this important achievement**". eJIFCC has seen a major improvement in both scientific content and publication format over the past few years again thanks to tireless efforts of the editor and the editorial board"

National and regional societies and associations have the opportunity to create, edit and 'own' specific **community pages within the Labs are Vital website**. These communities will be in the language of your choice and gives you the opportunity to better communicate issues and concerns unique to your region of the world. The community would appoint an 'editor' who would be responsible for local language content approval. For more information regarding how to establish a community within the LRV website please contact Mr. Richard Kent at richard.kent@kapleronline.com

4th Joint EFLM-UEMS Congress
"Laboratory Medicine at the Clinical Interface"
Warsaw, 21-24 September 2016
<http://www.eflm-uems.warsaw2016.eu/>

Still some days to submit your abstract!

Deadline for abstracts submission has been extended to May 30!

Among all accepted abstracts for poster display, some of them will be selected also for Oral Presentation. Accepted abstracts will be published in the CCLM Journal (on-line).

Abstracts can only be submitted via the congress website at: <http://www.eflm-uems.warsaw2016.eu/registration.html>

All presenting authors (max two abstracts per person) must register as delegates at the congress.
