

Chapter 16

Organisational Matters

16.1. IFCC Office

The IFCC Office is the unit of the IFCC responsible for carrying out, under the direction of the EB and in conjunction with Division and Committee members, the administrative and communication activities of the Federation. The IFCC Office reports to the EB through the Secretary.

The IFCC Office is the administrative centre of the IFCC, and maintains the Archives of the organisation. The IFCC Office is responsible for day to day financial operations such as: billing members for dues, controlling of claims, accounting of income and expenditures, quarterly budget report to the EB. It is also responsible for all contacts with Member societies for official communications sent to the Members by the Executive Board and its officers. The IFCC Office is responsible for most of the daily and organisational matters and is the point of contact for all IFCC activities. The IFCC Office has responsibilities for supporting the Executive Board, Division Executives and Committees, for maintaining the IFCC website and for all relevant documentation. The IFCC Office also supports the organisation of some IFCC Conferences. The IFCC Office is staffed by three employees, and other staff as required.

The IFCC Office is located within the premises of MZ Congressi, Milan, Italy, which is the professional congress organizer (PCO) for the IFCC.

The IFCC Office address is:

Via Carlo Farini 81

20159 Milan, Italy

E-mail: ifcc@ifcc.org

16.3. Nominations Committee

16.3.1. Summary

The Executive Board creates an ad hoc Nominations Committee (NC) and appoints the Chair. This occurs every third year with the Committee being appointed two years prior to the next Council meeting. It is the responsibility of the NC to invite, receive and process nominations for the next Executive Board. To do so, the NC solicits suggestions for candidates for each position on the Executive Board (except the Past-President and Corporate Representative), from Full Members of the IFCC and from key individuals within the management structure of the IFCC. The NC then recommends a slate of candidates consisting of one or more persons for each vacancy. Also, the candidates must be nominated by the Association of the country where the candidate works, and not by another Association of which they are a member.

The Nominations Committee will conduct this activity independent of the current Executive Board (whose members may be seeking re-election). Also, it will establish an appropriate deadline by which all nominations must be received. The NC does not function as a “Search Committee” and has no long-term role in “human resource development” or “succession planning”.

The election for the new EB will be conducted by electronic ballot and the result will be announced at the meeting of Council prior to the IFCC WorldLab 2020 meeting in Seoul.

16.4. Annual Report

The IFCC Annual Report is an important document. It is prepared at the beginning of each calendar year as a summary of the past year's activities. It is compiled by the Secretary of IFCC from the reports of the respective IFCC Officers, National Societies and Regional Federations. The IFCC Annual Report gives National Societies an opportunity to report their activities to other member societies. These reports are a part of the IFCC Annual Report, which is available in the IFCC website www.ifcc.org. The IFCC Annual Report is also published in Lab Medica International as a short version without the reports of the National Societies.

16.5. IFCC Handbook

The production of the IFCC Handbook occurs once every three years and coincides with the term of the Executive Board. It is available from the IFCC website (www.ifcc.org). The Handbook gives all the information about the operations and activities of IFCC.

The Handbook includes a section on the organisation of IFCC, its aims and strategic objectives over the three-year term of the Executive Board. The Handbook lists IFCC Regional Organizations, Divisions, Committees, Working Groups and Task Forces, IFCC programmes and projects. The Full Members, Corporate Members and Affiliate Members are also included with the names and addresses of their contact persons. The Statutes and Rules of the IFCC are the basis of its operations and they are also published in the Handbook. The Handbook is intended to give basic information on IFCC and its operation and to help readers to find contacts with laboratory experts involved in IFCC activities.

16.6. IFCC Procedures Manual

The IFCC Procedure Manual is a document which details the procedures for all the IFCC activities. It helps new IFCC officials learn about how IFCC operates. This document is available for the IFCC officers only.

16.7. Project Proposal Forms

Proposals for new projects must be submitted on a Project Proposal Form that can be requested to the IFCC Office (ifcc@ifcc.org)

16.8. IFCC Numbering System

The IFCC uses a numerical system for all its official correspondence. This numbering system is also used for storing and archiving IFCC records. The numbering system is continually updated with new activities. The system at the time of preparing this Handbook was as follows.
