Doctor David B. SACKS selected to receive the 2020 IFCC Distinguished Award for Laboratory Medicine and Patient Care

Milan, 24 April 2020 - The IFCC, the international leading organization in the field of Clinical Chemistry and Laboratory Medicine, is pleased to announce that Dr David B. SACKS (National Institutes of Health Department of Laboratory Medicine, Bethesda, MD, USA), has been selected to receive the 2020 IFCC Distinguished Award for Laboratory Medicine and Patient Care sponsored by Sekisui Diagnostics. This award honours an individual who has made unique contributions in Laboratory Medicine, its application in improving patient care, and having a worldwide impact in clinical medicine. The IFCC is very pleased to acknowledge the support from Sekisui Diagnostics in the recognition of scientists and educators with a distinguished career in this area.

Dr Sacks’ pioneering work has undoubtedly led to improvements in patient care, particularly related to screening, diagnosis and monitoring in patients with diabetes mellitus. He is one of the key individuals who has made a global impact and lasting clinical contributions in the field of diabetes, specifically in the area of hemoglobin A1c (HbA1c) standardization and glucose assays. Dr Sacks was chair of the Clinical and Laboratory Standards Institute (CLSI, formerly NCCLS) subcommittee that developed the C30-A guideline “Ancillary (Bedside) Blood Glucose Testing in Acute and Chronic Care Facilities” published in 2002, and now in its 3rd edition. Dr Sacks sustained and very substantial contributions to laboratory medicine and highlight the direct impact to patient care on a global level. Dr Sacks has undoubtedly made substantial contributions to the field and patient care. His lifelong commitment to improving and standardizing laboratory testing related to diabetes has positively influenced and directly impacted the lives of millions of individuals.

Prof. Maurizio FERRARI, IFCC President and Chair IFCC Awards Committee, said: "We are delighted in selecting Dr David B. SACKS for the 2020 IFCC Award for Distinguished Award for Laboratory Medicine and Patient Care. He has a remarkable career in the field of clinical chemistry and laboratory medicine, and his efforts in delivering education in laboratory medicine by tailoring contents and formats effective for individuals across so many countries is unprecedented. I really
believe that Dr Sacks is a most worthy recipient of the **2020 IFCC Award for Distinguished Award for Laboratory Medicine and Patient Care**.

The 2020 IFCC Awardees are a witness of the contribution that IFCC gives to advancement of excellence in laboratory medicine for better healthcare worldwide. **Doctor Sacks**, along with nine other IFCC Distinguished Award winners, will be formally announced on Wednesday 6th January 2021 at the Opening Ceremony of the 24th WorldLab - IFCC International Congress in Clinical Chemistry and Laboratory Medicine to be held in Seoul (South Korea) from 6th to 10th January 2021.

ABOUT IFCC

IFCC is the leading organization in the field of Clinical Chemistry and Laboratory Medicine worldwide. Through leadership and innovation in science and education, IFCC strives to enhance the scientific level and the quality of diagnosis and therapy for patients throughout the world. IFCC builds on the professionalism of its members to provide quality services to patients. IFCC is a Federation of 93 Full Member and 17 Affiliate member Societies of Clinical Chemistry and Laboratory Medicine representing more than 45,000 individual clinical chemists, laboratory scientists, and laboratory physicians and 48 Corporate Members covering the major areas of clinical laboratory developments. For further details please contact: ifcc@ifcc.org.

ABOUT Sekisui Diagnostics

For over 35 years Sekisui Diagnostics has been committed to providing innovative medical diagnostics to physicians and laboratories. We develop, manufacture, and supply billions of tests each year to the global healthcare market. Our product lines include clinical chemistry and coagulation systems and reagents, point-of-care molecular, rapid tests and immunoassay system as well as enzymes and specialty biochemicals.
