DR RAJESH KUMAR GUPTA AT APFCB 2016

The 'APFCB Congress 2016' held in beautiful city; Taipei was wonderful. The attraction of this congress was scientific workshops and symposium which were very useful for me as I have got new ideas and research techniques. I've got great opportunity to meet with foreign professors and researchers which helps me to know about scientific research in foreign countries. I greatly enjoyed the IFCC-ROCHE travel scholarship certificate distribution event as it is a great day for me to receive the certificate from IFCC president and past president. I can't forget the cultural night and dinner at the end of APFCB Congress.
