

IFCC SPEAKERS BUREAU

*You may choose from the following list of topics (or suggest a different topic) for the IFCC VLP or any other educational programme that is being planned.
The names of recommended speakers are given next to each topic. However, you may nominate your own speaker.*

❖ Accreditation

- Challenges in the process of implementation of ISO 15189
- Essential audit criteria of ISO 15189, which I should know and are not in the Standard
- Guidelines for blood collection

- Impact of ISO 15189 Accreditation on patient safety
- ISO 15189
- ISO 15189, Audits
- ISO 15189, Audits
- ISO 15189, Audits
- ISO 15189, Audits
- ISO 15189 accreditation of medical laboratories
- ISO 15189 accreditation of medical laboratories
- ISO 15189 accreditation of medical laboratories
- ISO 15189 accreditation of medical laboratories
- ISO 15189, ISO 9001
- ISO 15189, Method Evaluation and Quality Management
- ISO 15189 accreditation of medical laboratories and blood banks
- ISO 15189 - Documentation, policies, plans, processes, procedures and records
- ISO 15189 - Documentation, policies, plans, processes, procedures and records
- ISO 15189 - Pre examination, examination and post examination processes
- ISO 15189 - Planning process and implementation
- ISO 15189 accreditation of medical testing laboratories
- ISO 22870
- ISO 22870 - POCT and responsibility of the laboratory
- ISO 15189 Accreditation: costs and benefits
- ISO 20658:2017

Suggested Speakers

Dr. Alba Cecilia Garzon (Colombia)	Spanish
Dr. Alba Cecilia Garzon (Colombia)	Spanish
Dr. Gabriel Lima-Oliveira (Brazil)	Portuguese, English, Spanish, Italian
Dr. Alba Cecilia Garzon (Colombia)	Spanish
Dr. Bernard Gouget (France)	French, English
Bioq. Christina Herrera (Chile)	Spanish
Bioq. Roberto Carboni (Chile)	Spanish
MSc. Tamara Andrade (Ecuador)	Spanish
Dr.M.del Carmen Pasquel Carrera (Ecuador)	Spanish
Dr. Milena Monari (Chile)	Spanish, English
Dr. Rosa Sierra-Amor (Mexico)	Spanish, English
Dr.M.del Carmen Pasquel Carrera (Ecuador)	Spanish
Prof. Mario Plebani (Italy)	Italian, English
MSc. Patricia Hernandez (Mexico)	Spanish
Dr. Sandra Quintana (Mexico)	Spanish
ME. Jezabel Vite (Mexico)	Spanish
Dr. Herbert Stekel (Austria)	German, English
Dr.M.del Carmen Pasquel Carrera (Ecuador)	Spanish
Dr. Herbert Stekel (Austria)	German, English
Dr.M.del Carmen Pasquel Carrera (Ecuador)	Spanish
Prof. Paivi Laitinen (Finland)	Finnish, English
Dr. Bernard Gouget (France)	French, English
Dr. Herbert Stekel (Austria)	German, English
Prof. Ken Sikaris (Australia)	English
Dr. Gabriel Lima-Oliveira (Brazil)	Portuguese, English, Spanish, Italian

Language

cont Accreditation

- Laboratory accreditation audits
- Preanalytical errors
- Quality systems
- Risk Management and its implementation in ISO 15189
- The assessment process

❖ Analytical chemistry

- Analytical Chemistry
- Analytical Methods evaluation/verification
- HPLC

❖ Autoimmunity

- ANA HEp-2 cytoplasmic patterns – recognition on the microscope and clinical importance
- ANA testing in "real life"
- ANCA--associated vasculitis – diagnostic guidelines and critical analysis of the laboratory assays
- Anti Ro52 reactivity is an independent and additional serum marker in connective tissue diseases
- Autoantibodies as tools for cellular and molecular research
- Autoantibodies in systemic inflammatory rheumatic diseases: an update on what is new and important
- Autoantibody standardization committee: How do we make old and new ANA standards
- Biomarkers of subcutaneous calcinosis in systemic sclerosis and inflammatory myopathies
- Bringing the autoimmunity lab and the clinician together – how to bridge the extremes
- Dense fine speckled ANA IIF pattern (AC-2) and anti-DFS70 antibodies: cleaning up the current concepts
- ICAP Consensus in ANA Reporting: everything you need to know
- Immunobiology of subcellular autoantigenic rods/rings structures (IMPDH filaments)
- International Consensus of ANA Patterns: how to interpret findings in the lab and for the clinician
- Serum calprotectin: what do we have to know?
- Subcellular rods/rings as targets of autoantibodies in HCV therapy
- The new era of the ICAP nomenclature: an Italian experience
- The long road and the experience from the Brazilian Consensus in HEp-2 Patterns to ICAP
- The current status of the International Consensus on Anti-nuclear antibody Patterns (ICAP) and future directions

cont Autoimmunity

- Update on autoantibodies in idiopathic inflammatory myopathies

❖ Biological variations

- How to establish biological variation data
- How to use biological variation data to 1) set performance specifications 2) monitor patients 3) generate personal reference intervals

❖ Blood Gas

- Blood Gas
- Blood Gases and emergency
- Evolution of Blood Gas Analysis – Acid-Base Balance and Practical Applications of the Acid-Base Chart
- Evolution of Blood Gas Analysis – Focusing on the Source of Impaired O₂ Supply to the Tissue
- New biosensors
- New devices
- New technologies (in vitro, ex vivo and in vivo)
- Pathophysiology of blood gases
- Value of Point of Care Blood Gas Testing

❖ Bone, Calcium and Vitamin D Metabolism

- Assessment of mineral bone metabolism and vitamin D in adult
- Bone calcium and Vitamin D Metabolism
- Vitamin D metabolism and impact on health
- Vitamin D Assays
- Vitamin D

❖ Cancer

- Basic informatics for molecular cancer profiling
- Basic principles of epigenetics and epigenetic regulation in cancer therapy
- Blood and non-blood sources of cell-free DNA (cfDNA) for non-invasive cancer molecular profiling
- Cancer biomarkers
- Circulating tumor DNA: A promising biomarker in the liquid profiling of cancer
- Circulating tumor DNA: current analytical validity, clinical validity and utility
- Clinical applications of cancer molecular biomarkers
- Clinical applications of cancer molecular biomarkers
- Effects of TNF related Apoptosis Inducing Ligand (TRAIL) on apoptosis in cancer cells

cont Cancer

- Hybrid Compounds as Multitarget Directed Anticancer Agents
- Human b in CG
- Interpreting tumour marker results
- Implementing cancer molecular profiling
- Likelihood ratios - a more informative way of reporting laboratory results: studies with tumour markers
- Liquid biopsy: Circulating free DNA (cfDNA) and Circulating Tumour Cells (CTC) as Novel Biomarkers
- Liquid profiling assays in the era of precision oncology: Current status of assay limitations and future development
- Natural Product Inhibitors of Histone Deacetylases as New Anticancer Agents
- PSA and other members of the kallikrein family
- Seminal Cell-Free DNA Assessment as a Novel Prostate Cancer Biomarker
- Tumour marker reference intervals
- Understanding PSA refinements: age related reference intervals
F/T PSA ratio and PSA doubling time

❖ Cardiovascular Biochemistry

- Assay-related issues in the measurement of cardiac troponins and natriuretic peptides
- Cardiovascular biomarkers
- Cardiovascular biomarkers
- Biomarkers based management of acute coronary syndromes and heart failure
- Biomarkers of Heart Failure
- Biomarkers of myocardial infarction
- Cardiac Biomarkers: an evidence based approach to utilization
- Cardiac biomarkers: all analytical & clinical topics
- Cardiac markers in chronic kidney disease
- Cardiovascular biomarkers
- Cardiovascular disease: Pathophysiology and Laboratory Assessment
- Cardiovascular Diseases in chronic renal diseases and diabetes mellitus
- Coronary heart disease biomarkers
- CRP and inflammatory markers
- Diagnosing myocardial injury and myocardial infarction
- Evidence based cardiac biomarker testing
- High sensitivity troponin for early MI rule out
- High-sensitivity troponin: rule-in and rule-out strategies
- Ischemia-modified albumin
- Natriuretic peptide measurement: current use, future promise
- Novel biomarkers of cardiac risk and management
- Novel biomarkers for acute cardiovascular disease

cont Cardiovascular Biochemistry

- Oxidative stress, inflammation, and endothelial injury in accelerated atherosclerosis
- Potential risk predictors for cardiovascular diseases in patients with obstructive sleep apnea syndrome
- Rapid rule in and out using cardiac biomarkers
- The basics of cardiac biomarker interpretation
- Understanding the relationship between cholesterol and insulin resistance.
- Vascular markers of Atherosclerosis

❖ Cerebral diseases

- Inflammatory response of the brain following cerebral ischemia
- Neuro inflammation and anti-inflammatory treatment options for Alzheimer's disease
- Pathophysiology of Cerebral Ischemia. Mechanisms Involved in Neuronal Damage

❖ Cerebrospinal Fluid

- CSF bilirubin, xanthochromia and detection of subarachnoid haemorrhage
- Cerebrospinal fluid

❖ Chronic Kidney Disease

- Diagnostic proteomic markers to detect kidney diseases
- Estimating glomerular filtration rate from serum creatinine measurements: analytical issues and standardisation programs
- Non traditional cardiovascular disease risk factors and arterial inflammatory response in end-stage renal disease
- Protein carbamylation and carbamylation derived products as biomarkers

❖ Clinical Usefulness of Analytes

- Adding clinical utility to laboratory reports
- Biomarkers associated with COVID 19 disease progression
- Coenzyme Q10 - evidence base for a clinically useful analyte
- C.difficile and Antimicrobial Stewardship
- Hepatopathies in patients with dengue
- Hemostasia, platelets function
- Is this assay clinically useful - the paradigm of natriuretic peptides
- Iron Metabolism
- Public Health & Hospital Administration, Sciences Communication, Antimicrobial Resistance
- Value and Impact of Laboratory Medicine in Healthcare
- Value and Impact of Laboratory Medicine for human health
- Value and Impact of molecular testing
- Why Knowing Now Matters in the ED
- Zika Virus update in Latin America

❖ Covid- 19

- Molecular, Biochemical and Serological Testing of COVID-19
- Pathophysiology of COVID-19 and Mechanisms Underlying Progression to Death

Suggested Speakers

Dr. Khosrow Adeli (Canada)
Dr. Khosrow Adeli (Canada)

Language

English
English

❖ Cytokines

- Cybernetics of cytokines and chemokines: pathophysiology and clinical applications
- Leptin and adiponectin in insulin resistance
- Physiology and Laboratory Assessment of Cytokines and Chemokines

Suggested Speakers

Prof. Christopher Lam (Hong Kong)
Prof. Edgard Delvin (Canada)
Dr. Khosrow Adeli (Canada)

Language

English
French, English
English

❖ Diabetes, Insulin Resistance and Metabolic Syndrome

- Controversies in thyroid hormones
- IFCC recommendation on reporting results for blood glucose & sources of error in glucose POCT
- Diabetes: metabolic and genetic characteristics related-Lipids
- Diabetes mellitus (markers, HbA1c, advanced glycation end products)
- Diabetes and the role of the Laboratory
- Diabetes is an Intestinal Disease: Reversal of Diabetes by Bariatric Surgery
- Diabetic glucose monitoring in 2010: a testing odyssey implementation
- Diabetes: testing and autoantibodies
- eAG and the correlation of HbA1c and glucose
- HbA1c for screening and diagnosis of diabetes
- Insuline resistance Type 2 Diabetes
- Laboratory assessment of insulin resistance
- Leptin and adiponectin in insulin resistance
- Metabolic syndrome in adolescent children and adults
- Pediatric obesity, prediabetes and metabolic syndrome
- Pathophysiology of diabetic dyslipidemia
- POC testing for monitoring and diagnosing diabetes mellitus

- Post-translational modification of proteins (glycation - glycooxidation - carbamylation)
- Post-prandial Dyslipidemia in Obesity & Insulin Resistance
- Self-monitoring of blood glucose

- The effect of hemodialysis on accelerated atherosclerosis in diabetic patients
- Small dense Low-Density Lipoprotein as Biomarker for Atherosclerotic Diseases
- The metabolic syndrome in youth and polymorphic genes

❖ Education and communication

- Online education
- IT and new technologies of information and communication

Suggested Speakers

Dr. Eduardo Freggiaro (Argentina)
Dr. Eduardo Freggiaro (Argentina)

Language

Spanish, English
Spanish, English

❖ Emerging technologies

- A new era of Communication in Medical Diagnostics & Clinical Laboratory Medicine
- Artificial intelligence
- Big data
- E-health
- Electronic Apps and Medical Diagnostics Data Management
- Emerging technologies and chronic diseases
- Mobile health
- Mobile health and digitalization
- Technological advances in Laboratory Medicine: Predicting the Lab of the Future

❖ Ethics

- Bioethics in Lab Med
- Ethics
- Ethics and AI
- Ethics and medically assisted reproduction
- Ethics and regulations
- Ethics in laboratory medicine
- Ethics in medical research

❖ Evidence-Based Laboratory Medicine

- Evaluation of new biomarkers
- Evidence-based guidelines in laboratory medicine
- Evidence-based guidelines in laboratory medicine
- Evidence in action - using evidence in practice
- Evidence-Based Laboratory Medicine on clinical usefulness of laboratory tests
- Evidence-Based Laboratory Medicine: one to four day workshop
- Evidence-Based Laboratory Medicine: practical examples of benefit
- Evidence-Based Laboratory Medicine: principles and promise
- Evidence-based monitoring
- Guidelines development clinical cooperation
- Harmonization of critical risk result management
- How to design alert lists of critical risk results
- How to (re)define disease definitions using laboratory tests
- Introduction to Evidence-Based Laboratory Medicine
- Introduction to Evidence-Based Laboratory Medicine

- Management of critical risk result communications
- Evidence-based Medicine and Point of Care Testing
- Outcome-based performance specifications for laboratory tests
- Overdiagnosis and overdetection in laboratory medicine
- Study design and quality of evidence for diagnostic tests

cont Lipids

- Lipids and lipoproteins
- Lipid Lowering Therapies: Statins, Fibrates, and PCSK9 Inhibitors
- Measurements in lipoprotein subclasses
- Neuroendocrine Regulation of Lipid and Lipoprotein Metabolism
- Role of drugs and lifestyle in the management of dyslipidaemia

❖ Mass Spectrometry

- Clinical Mass Spectrometry: Applications in Drug Monitoring, Endocrinology and Metabolism
- Mass spectrometry in the endocrinology laboratory
- Mass spectrometry in the therapeutic drug monitoring (TDM) laboratory
- Mass spectrometry in the toxicology laboratory

❖ Molecular Biology

- Advanced molecular techniques for the diagnosis of Alzheimer disease
- Apoptosis, Clinical Significance and Therapeutic Approaches
- Expanding space for Next Generation Sequencing diagnostics applications
- From macro to nanotechnology: the future of laboratory medicine
- Impaired antioxidant mechanisms in kidney diseases
- Iron metabolism genes and molecular diagnostics
- Liquid profiling: pre-analytical challenges
- Molecular autopsy: utility for cardiac arrhythmias
- Molecular Diagnostics & Point of Care Testing
- Molecular Diagnostics, Molecular Genetics
- Molecular Diagnostics
- Molecular diagnostics and point of care testing
- New trends in molecular diagnostics
- NGS and beyond
- Non-invasive prenatal diagnosis by circulating nucleic acid analysis
- Proteasome inhibition sensitizes cancer cells to TRAIL mediated apoptosis
- Quality assurance and molecular diagnosis
- Sensitivity of human cancer cells to TRAIL/Apo-2L-induced apoptosis through upregulation of death receptors
- Utility of molecular testing in urology

❖ Nutrition

- Data mining as a laboratory management tool
- Microbiotic and Nutrition
- Natural product modulators to overcome multidrug resistance in cancer
- Nutraceuticals - sources and benefits for human health
- Nutrient Sensing Mechanisms via Taste Receptors: Key Role in Control of Food Intake and Metabolism

cont Nutrition

- Nutrition of the premature and term neonate
- Redox modulators and chemoresistance in cancer therapy: beneficial versus deleterious effects
- The role of the laboratory in nutritional support
- The role of the laboratory in nutritional support
- Understanding vitamin B12 through measuring active B12

❖ Obesity

- The Obesity Epidemic: Understanding the cause, impacts and cure
- Obesity and Metabolic Syndrome
- Obesity and Metabolic Syndrome
- Paediatric obesity and Metabolic Syndrome

❖ Oxidative Stress

- Antioxidants - diet or supplements?
- Are uremia, diabetes, and atherosclerosis linked with impaired antioxidant mechanisms?
- Correlation of carotid artery intima-media thickness with oxidative stress in diabetic patients on hemodialysis
- Diverse effects of antioxidants on the cytotoxicity of chemotherapeutic drugs
- Free radicals: the role of antioxidants and pro-oxidants in cancer development and therapy
- Laboratory assessment of oxidative stress
Natural redox modulators of oxidative stress and chemoresistance in cancer therapy: beneficial versus deleterious effects
- Oxidative stress and accelerated atherosclerosis in end-stage renal disease
- Oxidative stress and apoptosis: impact on cancer therapy
- Role of oxidative stress in disease (specifically atherosclerotic cardiovascular disease, macular degeneration or pre-eclampsia)

❖ Patient focused Laboratory Medicine

- Reporting to patients: patients as costumers

cont Paediatric and Adolescent Clinical Biochemistry

- Paediatric and adolescent clinical biochemistry: Childhood obesity, prediabetes and metabolic syndrome
- Point of care testing in the paediatric setting
- State of the art for pharmacogenomics

❖ Personalized Medicine

- Technologies for personalized medicine
- Data science enabling personalized medicine
- Big data and ageing
- Personalized Medicine

❖ Pharmacogenetics

- Clinical implementation of pharmacogenetics
- Pharmacogenetics of cytochrome P450 enzymes
- Pharmacogenetics for solid organ transplantation management
- Pharmacogenetics of tamoxifen
- Pharmacogenetics in oncology
- Pharmacogenetics and pain management
- Pharmacogenetics, the role of laboratory medicine

❖ Point of Care Testing

- Applicability of the CLSI EP23 Guide in POCT devices
- A quality improvement system for POC Testing
- Benefits and management of POCT
- Benefits and management of POCT
- Biosensors and the cloud
- C difficile and Antimicrobial Stewardship
- Direct to consumer testing
- External quality assessment of POCT testing
- Evidence Based Medicine and Point of Care Testing
- IFCC recommendation on reporting results for blood glucose
- Implementation of the SGC ISO 22870
- ISO 22870 - POCT and responsibility of the laboratory
- Management & continuous quality improvement of point of care testing
- Management of the risk in POC devices
- Method verification on POCT devices
- Molecular Diagnostics & Point of Care Testing
- NBIC
- New Technologies and devices
