

VOLATOLOMICS

Larry J Kricka, Joe Wiencek, Paolo Fortina

(IFCC Emerging Technologies Division, WG-Vol)

INTRODUCTION

The IFCC Emerging Technology Division (ETD) is dedicated to providing current awareness for emerging technologies likely to have important clinical diagnostic applications in the near future. One of those technologies is volatolomics (breathomics) (i.e., breath analysis).

This is the final update of the volatolomics survey <https://www.ifcc.org/media/478026/2019-06-volatolomics.pdf>) and it primarily covers the 2020 and 2021 scientific literature.

1. VOLATOLOMICS AND BREATH ANALYSIS IN THE NEWS
